PROFESSIONAL SUMMARY

Computer programming student and freelance developer specializing in Django and Python. Hands-on experience taking a B2B e-commerce platform to production — data modeling, business logic, security, and deployment. Actively building a foundation in Machine Learning and Artificial Intelligence, backed by coursework in probability and statistics.

EXPERIENCE

Freelance Backend Developer — Distribuidora Esperanza

May 2026 – July 2026 · Freelance

- Collaborated on a B2B e-commerce platform built in Django for a wholesale beverage distributor, owning the project end to end.
- Implemented wholesale and promotional pricing logic, stock management, and the checkout flow.
- Designed the PostgreSQL data model, including optimized product image storage (compressed with Pillow).
- Deployed and maintained the application in production on Railway, including database migrations.
- Conducted a security audit and resolved bugs across the admin panel and purchase flow.
- Led a full mobile-responsiveness overhaul across the entire platform.

EDUCATION

Associate Degree in Computer Programming

Universidad Nacional Guillermo Brown, Argentina · 2025 – Present · Expected graduation: December 2027

TECHNICAL STACK

Python · Django · PostgreSQL · SQL · Git · Railway · Pandas · scikit-learn (en formación)
